Line Item Changes - Rationale's, Justifications and Amounts

All items below refer to the Attached Spreadsheet

For easier understanding and readability this is presented by first describing LINE ITEMS FROM WHICH MONEY IS TAKEN and then describing the LINE ITEMS INTO WHICH THE MONEY IS BEING TRANSFERRED.

The Attached Spreadsheet shows from which line items money is to be removed (in Red) and into which line items funds are being placed (in Black). *The net impact on the budget is zero.*

REMOVE FUNDS FROM:

- A. Building Renovation and Construction Remove \$10,646 from the areas of Activity 1: Plans/Permits/Documents/Related (\$4,721), and Activity 3: Outdoor Pads/Poles/Parking (5,925). Permits and related costs are under budget because some permits were acquired directly by the specific contractor and are included in their respective line item. The Outdoor Pads/Poles/Parking are largely not needed...the change in signage and outdoor attractant, described in D below, have eliminated the need for the pads. The poles are now part of the revised cost for signage and will be completed by the signage contractor, hence an increase in cost for the signage line. Parking requirements are minimal and will be included in Miscellaneous below.
- B. Audio/Video Tour Remove \$23,150. As the exhibits develop the technology, including audio and video are being incorporated into their fabrication...not as a separate stand-alone project as originally envisioned (all will be permanent). In addition, the second Bricks and Mortar grant includes further technology enhancements to a number of exhibits. Designing and building all of this as one seamless project is far more logical and will enhance the exhibits substantially. All these funds will be moved into Build/Install Exhibits and will be used for the creation and installation of additional technology, including audio and video components.
- C. Outdoor Graphics Remove \$8,541. David Dunleavy and Guy Harvey donated a substantial amount of time to the project and that aspect was therefore under budget. The resultant professionally painted mural is a far better result than originally planned graphics.
- D. Outdoor Attractant Remove \$30,850. The original plans called for a 14' tall artistic replica of a diving figure to stand outside on its own stand and as a separate entity from signage. The Village did not allow that figure to be displayed, but granted the Museum a substantial sign on which a smaller artistic figure will appear. Therefore, the purchase of the proposed figure is not required but cost of signage, below, will be increased..

E. Outdoor Signage – Remove \$834 from Activity 1, Canopy Signage. The sign contractor is able to do the signage without removing the canopy from the building.

MOVE THOSE FUNDS INTO:

- A. Building Design and Construction (renovation) Add \$34,123. To Activity 2: Walls, Doors (\$7,498), Activity 4: Plumbing (\$665), Activity 5: Electrical (\$14,000), Activity 6: Air Conditioning and Insulation (\$4,360) and Activity 7: Paint/Stucco/Floors (\$7,600). These cost overruns are due to a variety of factors including cost and labor increases since the grant was submitted (September '03) and required scope of work changes.
- B. Security Contractors Add \$3,264. To Activity 1: Electronic (\$2,372) because an upgraded system is required for both insurance and safety purposes. To Activity 2: Storm (\$892) since materials costs have skyrocketed and the original contractor refused to honor the original estimate and could not install for nearly nine additional months. Another contractor will install the shutters that the Museum purchased directly from the supplier.
- C. Build/Install Exhibits Add \$23,150. Moving all funds removed from Audio/Video Tour into this line item to enable better integration of activities and improvement of build flow. See B in "Remove Funds From" above.
- D. Outdoor Signage Add \$8,217. The Canopy Signage (Activity 1) is actually reduced (by \$834, see E above) but the Primary Signage (Activity 2) has been increased by \$8,217. The new sign will be held with two poles (not one as originally proposed), will incorporate the art object that was originally to be a separate item and will be more than twice as large as originally proposed.
- E. Miscellaneous Add \$5,267. There may be small overages on some of the line items and we will also have to stripe and put stops in the parking lot. These funds should cover those items and having this level of flexibility will avoid the need for an additional contract amendment for small final changes.

IMPACT: NO NET CHANGE IN AMOUNT

We believe that these changes of line items are a true and accurate reflection of the needs of the Museum at this time and will enable the project to continue its forward progress. Again, the bottom line doesn't change, just the allocation within line items.

The Museum accepted the lowest of thirteen estimates (all documentation available) when calculating the cost of the exhibits. The estimate we selected is from a not for profit museum and is approximately half the cost of the next lowest estimate. We calculated approximately 2,000-2,500 square feet will be covered by exhibits. This works out to 22 galleries or separate exhibit areas.

<u>Valuing In-Kind</u> Professional Museum Service of Museum Principals <u>REVISED 11/14/03 BASED ON TDC EXCLUSION OF TRAVEL/SHIPPING</u> The Florida Keys History of Diving Museum, Inc.

Museum staff researched estimates of industry standard costs and we have received documentation from both the Association for Science and Technology Museums and the Exhibits Committee of the American Museum Association. The national societies cost the exhibit interpretation and construction process for this object-based Museum to be in the range of \$450-600 per square foot. In addition, we have contacted commercial exhibit houses that were recommended by other museums. Their estimates were similar. All are documented via the letters that follow this descriptive analysis document. Higher costs are certainly possible depending on the level of interactivity and technological support required; however, these costs reflect real costs for the proposed Museum.

It is essential to understand that these costs are for constructing exhibits around ALREADY EXISTING ARTIFACTS (i.e., an "Object Based" display). The Florida Keys History of Diving Museum already has the artifacts from the collection of Drs. Joe and Sally Bauer. The \$1 million of Phase I artifacts already available to the Museum are a contribution in addition to any figures presented herein.

It is further important to note that just as in building construction the planning and design function are both integral and essential to the process. They are both thought of as components of developing and installing Exhibit Structures. Every one of the design/build houses integrates the two processes.

MOMITS (the Museum of Man In The Sea), a museum with a similar focus in north Florida has valued their interpretation and construction of all exhibits at the Florida Keys History of Diving Museum for \$160/sq. ft. Their estimate is therefore \$368,500 (after REMOVING travel and shipping costs, per TDC instructions). A separate company will provide the FIXED exhibit audio/video tour (at about half the price of the next lowest bid) for \$23,150. The total exhibit construction cost will therefore be \$391,650.

MOMITS and the audio/video tour companies can offer this reduced pricing because they are not-for-profit educational organizations with volunteers who help with museum activities and who have considerable design/build/install museum expertise.

MOMITS estimate is substantially below the estimate of the commercial estimates.

<u>IT IS UPON THESE LOWEST PRICE ESTIMATES THAT WE BASE OUR IN-KIND VALUATION.</u>

The Museum Principals have extensive experience in Museum collection and exhibit work. They have written for research-based diving publications and are worldwide lecturers on the history of diving. In addition, they have developed and displayed Museum Exhibits, highlighting their collection in various venues. Their historical knowledge of this field is extensive.

The Principals will be significant participants in the interpretive and building aspects of the exhibits.

Therefore, we value the in-kind contribution of the Principals to this effort based on the MOMITS (lowest) estimate of \$160/sq. ft. as follows:

MAXIMUM IN-KIND ALLOWABLE BY TDC IS 25% OF THE TOTAL PROJECT COST. TOTAL PROJECT COST (after removal of TDC \$10K exclusion for travel and shipping) IS \$596,324. Removal of \$10K from TDC side of budget removes a total of \$20,000 from the total original budget (difference is 2x due to matching component) reducing the effective working budget to \$586,324 of which \$293,162 (50%) is TDC funds.

THEREFORE, MAXIMUM ALLOWABLE IN-KIND IS \$146,581.

Estimates for Division of Services are as Follows:

Exhibit <u>Development:</u>	S Based on % of <u>Total</u>	In-Kind Principals Contribu.	<u>MOMITS</u>	Outside Expertise (Multiple)(1)
Interpretative Exhibit Structures Audio Tour Totals:	36,850 (.1)	14,000 (.4)	10,000	12,850
	331,650 (.9)	132,581 (.4)	20,000	179,069
	23,150 (Separate)	0	0	23,150
	391,650	146,581	30,000	215,069

NOTES:

1.) Many parts of an Exhibit are purchased in small quantities – i.e., 2 cases, or 4 pedestals, graphics for one gallery or display, etc. The "Outside Expertise" segment is for obtaining objects that would normally be used in the construction of an Exhibit.

2.) It is possible to reduce the normal costs of Interpretive Activities due to the Principal's unique expertise and background. In this way a higher portion of the funds can be allocated to Exhibit Structures.
